

REPORT TO EXECUTIVE			
PORTFOLIO AREA: STRATEGY & PERFORMANCE			
Date of Meeting:	18 February 2002		
Public/Private*	Public		
Key Decision:	No	Recorded in Forward Plan:	No
Inside Policy Framework			
Title:	Performance indicator report – April to December 2001		
Report of:	Town Clerk & Chief Executive		
Report reference:	TC1502		

Summary:

This report details how the City Council has performed against the Best Value and local indicators for the third quarter of this year. Cumulative totals for the year so far are also included. Comparisons with performance against 2001/02 annual targets and for the same period in 2000/01 are provided where appropriate. National upper quartile figures are included where available.

Recommendations:

That Members

- a) review the City Council’s achievements against the Best Value and local Performance Indicators for the third quarter and first nine months of the year, 2001/02.
- b) review the Council’s performance against the previous year and national upper quartiles, where appropriate, and annual targets for 2000/01.
- c) review the highlighted areas where performance is topical or appears significantly different from previous performance and/or targets.

Contact Officer: Stephen Vertigans **Ext:** 7016

1. BACKGROUND INFORMATION AND OPTIONS

- 1. This report provides Members with figures for the City Council’s performance against the Best Value and local Performance Indicators for the third quarter of 2001/02 and year to date.
- 2. Performance within topical areas or examples of indicators where the authority seems to be

performing badly or impressively against previous performance, local targets and national trends are highlighted.

2. PERFORMANCE INDICATORS 2002/2003

1. The authority is currently waiting for the DTLR to confirm the national indicators for 2002/03. Based upon the consultation paper it is expected that the number of national indicators will be significantly reduced and in the longer term more outcome indicators, particularly for partnership working, will be developed and linkage between BVPIs and other policy initiatives, e.g. PSAs will be improved.
2. As part of the development of the 2002-05 Corporate Plan, a number of the local indicators are being revised, deleted or added for 2002-03 and beyond to help the authority meet forthcoming service, corporate priorities and ultimately City Vision commitments. Some of the current performance indicators will be included next year to help the authority develop a consistent approach to performance management and benchmarking. However it is clear after collating and reporting the information that some indicators do not produce meaningful data to help manage performance. There is also an over concentration upon operational performance with limited attention placed to strategic direction. Departments have therefore been asked to ensure that only local indicators that make a significant contribution towards managing performance are included.
3. Targets within the plan are being developed by service units to enable the authority to meet the emphasis within the consultation paper upon a corporate approach to target setting that provides the basis for efficiency improvements and goes beyond the short term. Service units have been asked to provide forecasts in the light of past, current and anticipated performance and top quartile data, where available.

3. EXCEPTION REPORT

Reduce Crime & Disorder

Portfolio: Community Activities (*Community Overview & Scrutiny*)

No.	Description	OCT- DEC 2000	OCT- DEC 2001	APR - DEC 2001	2001/02 Target	Upper quartile (00/01)
BV126	Domestic burglaries committed per 1000 households (per 1000 pop =)	 (1.82)	3.64 (1.66)	11.51 (5.23)	 (6.51)	7
BV127	a) Violent crimes committed per 1000 population c) robberies committed per 1000 population	2.74 0.07	3.95 0.15	12.63 0.35	11.22 0.26	6
BV128	Vehicle crimes per 1000 population	3.37	3.18	9.29	12.37	8
BV130	Number of public disorder incidents per 1,000 population (For offences =)	0.41	23.76 0.66	70.37 1.92	 1.79	

LP1	Total number of recorded crimes	24 62	2609	8131	9499	
<p>Domestic burglaries</p> <p>Burglaries have fallen compared to the same quarter last year (10%) largely due to a significant drop within the month of December 2001, down over 65.4% from December 2000.</p> <p>The Crime and Disorder Reduction Partnership funded Operation Mallet through its Communities Against Drugs funding stream. This operation targeted known drug offenders and in particular the associated acquisitive crime committed by these offenders. The operation began in late November and is ongoing. Burglary figures for December are traditionally higher than in any other month. The December 2000 figure of 78 was the highest in that year. The December 2001 figure of 27 is lowest in 2001.</p>						
<p>Violent Crime/Disorder</p> <p>Further analysis into the rise in violent crimes and disorder still suggests that the Ethical Crime Recording system is the main cause for the increase.</p> <p>Historically, Police analysis has suggested that the ad hoc nature of these crimes meant there was no real intelligence to identify need and to target patrols. This crime was seen as an issue which could not be proactively prevented due to its impulsive and invariably unplanned nature. However the Project Hammered Targeted Policing Initiative challenges these theories but brings with it a new set of issues for recorded crime.</p>						
<p>Incidents of violence inside premises have actually reduced and the physical issues which have historically been a causal factor in incidents (e.g. premises, licensees, bouncers) appear to be now preventing violence. As a result there are more potential offenders on the street who been ejected from or refused entry to premises. This analysis led the Police to launch the high profile Operation Migraine which was initially planned to conclude at end of December. Its success has seen it continue into January. The principle behind the operation is early intervention into disorder and disputes to prevent them from becoming violent crimes. This is being resourced with additional officers, particularly at weekends. Early signs show that violent crime is reducing as a result with an encouraging drop in December, again a month for traditionally high numbers of this type of crime due to the high volume of people in public entertainment venues within that month.</p>						
<p>Total Recorded Crimes</p> <p>The total number of recorded crimes continues to increase. Again this is attributed to Ethical Crime Recording and increased methods of reporting such as via the CCTV control room. Increased police presence and intervention in operations such as "Migraine" will also lead to increases in recorded offences.</p>						

Promote Sustainable Transport

Portfolio: Infrastructure, Environment & Transport

(Infrastructure Overview & Scrutiny)

No.	Description	OCT - DEC 2000	OCT - DEC 2001	APR - DEC 2001	2001/02 Target	Upper quartile (00/01)
LP14	% budget targets met for car park income	97	113	113	95	
<p>It is believed that there are a number of reasons for the increase in income. These include the completion of the North Lanes development and the improved offer in the city centre, extensions to residents parking initiatives which may have resulted in some transfer of short stay parking to off street car parking. Footfall generally has increased in smaller regional city centres following public safety concerns post September 11th. Secured car parking standards are also considered important and have been well received by</p>						

motorists in attitude surveys.

Protect & Improve Environment

Portfolio: Health & Well Being (*Community Overview & Scrutiny*)

LP114	% of food premises inspections that should have been carried out that were carried out:					
	High Risk:-	82	62	78.6	85	100
	Others:-	78	68	87	85	100
Performance dropped during the third quarter due to one of the team of four leaving. A replacement will be starting in March and performance is expected to improve from May after the new member of staff has received the required training.						

Portfolio: Infrastructure, Environment & Transport (*Infrastructure Overview & Scrutiny*)

BV109	% of applications determined within 8 weeks	75.7	69.23	74.03	75	73
BV110 (amended)	Average time taken to determine all applications	7.76	8.67	7.97	8.10 weeks	9
Performance for these two indicators dropped in the third quarter due to a member of staff leaving in August. A replacement started in December and performance will improve accordingly.						

Develop Employment & Training Opportunities

Portfolio: Economic Prosperity (*Infrastructure Overview & Scrutiny*)

No.	Description	OCT- DEC 2000	OCT- DEC 2001	APR - DEC 2001	2001/02 Target	Upper quartile (00/01)
LP81	Visitor numbers at Tourist Information Centres	35190	23,463	124,518	188,000	
Drop in numbers is thought to be part of national trend linked to drop in number of visitors post 11 th September. It is also thought that foot and mouth continues to have a detrimental impact on visitors.						
LP58	No. of users of Brampton Business & Telecentre	1453	1274	2913	5500	
Reasons for drop in number being investigated but is expected to be linked to data collation.						

Satisfy Housing Need

Portfolio: Health & Well-Being (*Community O&S*)

BV68	Average relet times for dwellings let in the previous financial year (days); a. all properties b. properties excluding Botcherby/Raffles	9.2 wks	73 64	79 64	(a) 84 (b) 42	26 days
BV69	Percentage of rent lost through the local authority's dwellings becoming vacant	5.7	Gross: 8.08% Net: 7.56%		4.92	0.9
LP67	Proportion of properties let to new tenants within 28 days of termination of previous tenancy	18.6	11%	9%	28%	
The lower than expected performance for these interlinked PIs is due to the low demand (or excess supply) problem that has spread beyond Raffles and Botcherby and is now affecting other estates (Report TC238 refers). As identified in the Housing Business Plan, the stock transfer is seen as the only option to tackle both stock condition and areas of low demand.						
BV72	The percentage of urgent repairs completed within Government time limits	94.3	91%	85.3%	98	97
LP72	The proportion of repairs carried out within local priority time scales	86	74.9%	82.3%	95%	
Interpretations of the limits are now stricter and all contractors and internal consultants now included. Performance appears to have dropped accordingly.						
BV73	The average time taken to complete non-urgent responsive repairs	32.5 days	43.1 days	40 days	31 days	12
Indicator does not meaningfully measure performance as fluctuations tend to be consequence of number of different factors.						
No.	Description	OCT-DEC 2000	OCT-DEC 2001	APR - DEC 2001	2001/02 Target	Upper quartile (00/01)
LP64	Proportion and number of responsive and planned housing repairs post inspected to determine value for money and quality standards are maintained..	11%	8.9%	6.5%	12%	
The number of repairs remains low, however the financial value of work post inspected equated to 26.6%. Surveyors use their judgement on which orders to check and will inspect orders where they will get a greater return, i.e. will not check replacement of tap washer (one property - £4.71), but will check renew guttering to a street (several properties - £800+).						
LP70	Analysis of housing arrears	2643	2353		2300	
	a) Number of cases	649k	588k		£491,867	

b) Value of debt	£246	£250	£214	
c) Average debt.				
Best Value review of housing debt identified that decreasing demand for properties has had an adverse effect on rent arrears (report TC1402 refers).				

Advance Carlisle as a regional & cultural capital

Portfolio: Community Activities (*Community Overview & Scrutiny*)

BV170	a. Number of visits to/usages of museums per 1,000 population	548.1	1600	2874	2136	553
	b. Number of those visits that were in person per 1,000 population	496.6	706	1761	1942	504
As reported in previous quarter, door count is higher than last year (42% for same period in 2000/01) due to Millennium gallery and exhibitions in art gallery Celebrating Boxes and Winifred Nicholson. Usage has also increased considerably primarily due to huge number of website hits to new web site www.tulliehouse.co.uk .						

How well is authority run

Portfolio: Corporate Resources (*Corporate Resources Overview & Scrutiny*)

BV12	Number of working days/shifts lost due to sickness absence	3.6	5.7	9	8.7	6.8 (04/05 DTLR target)
It is considered that aiming for the DLTR upper quartile (over 5 years) in sickness absence is currently over ambitious. Sickness absence in the NW of England has always been higher than the national 'norm'. Half of Carlisle's sickness absence is due to long-term sickness, and these cases take longer to resolve, especially in cases where there are DDA considerations. Training for Managers in managing sickness absence has been provided in Dec 01 – Jan 02, and more detailed information on sickness absence is being provided to assist in work to reduce sickness absence. A report explaining the position in more detail was submitted by the Head of Personnel Services to JMT on 3 December 2001.						
BV13	Voluntary leavers as % of staff in post	1.36	1.03	5.64	6.5	7.6
If the current rate is maintained the voluntary turnover for 2001/2 is likely to be 7.5% (estimated), which is similar to 1999/2000 (7.4%). The aim was to reduce this, but as the job market is more buoyant, and turnover always increases in times of uncertainty, with hindsight, this target was over ambitious. Given these two factors, maintaining voluntary turnover at around 7.5% is considered to be an achievement.						

8. RECOMMENDATIONS

That Members

a) review the City Council's achievements against the Best Value and local Performance Indicators for the third quarter and first nine months of the year, 2001/02.

b) review the Council's performance against the previous year and national upper quartiles, where

appropriate, and annual targets for 2000/01.

c) review the highlighted areas where performance is topical or appears significantly different from previous performance and/or targets.
