

Carlisle City Council

Report to Audit Committee

Report details

Meeting Date:	8 December 2022
Portfolio:	Finance, Governance and Resources
Key Decision:	No
Policy and Budget Framework	Yes
Public / Private	Public
Title:	STATEMENT OF ACCOUNTS 2022/23
Report of:	CORPORATE DIRECTOR OF FINANCE AND RESOURCES
Report Number:	RD 45/21

Purpose / Summary:

This report provides information regarding the forthcoming 2022/23 Final Accounts process. The report also includes the draft accounting policies that will be used in the closedown of the 2022/23 accounts.

Recommendations:

Members are asked to note the update on the 2022/23 accounts and to consider the draft accounting policies to be used in the preparation of the 2022/23 accounts.

Tracking

Audit Committee:	08 December 2022
------------------	------------------

1. BACKGROUND

- 1.1 The revised Accounts and Audit (Amendment) Regulations 2021 reflect the changes of the MHCLG (now DLUHC) consultation on revised dates for publishing and auditing the Statement of Accounts for 2022/23. The amended requirements changed the fixed period for public inspection to start on or before the first working day of August and therefore the unaudited accounts were to be published at the latest by 31 July. However, the amended regulations only applied to the financial years' 2020/21 and 2021/22 and therefore for 2022/23 the statutory deadline for public inspection reverts to the first 10 working days of June meaning the draft accounts are to be completed by 31 May 2023.
- 1.2 The audit must then be concluded by 30 September 2023. The Auditors will then submit its Annual Audit Findings Report. This report, which summarises the audit work undertaken, conclusions reached and any subsequent recommendations, will be considered by the Audit Committee at its meeting at the end of September (unless notified otherwise). The Council's S151 Officer may provide a response report to that same meeting.
- 1.3 The Accounts must then be published and will be available in hard copy and on the Council's website.
- 1.4 In order to provide a set of Accounts by these deadlines which are also in accordance with relevant Codes of Practice, Regulations and Guidance, the final accounts process commences in January with the production of an internal timetable for the completion of the various tasks involved. This timetable is monitored by Financial Services officers and progress reported to the Senior Management Team throughout the final accounts process as it is essential that a corporate approach be taken to achieve a set of Accounts which gives a true and fair view of the financial position of the Authority.

2. CHANGES ARISING FROM THE 2022 CODE OF PRACTICE ON LOCAL AUTHORITY ACCOUNTING

- 2.1 There are no significant changes to the 2022 Code of Practice on Local Authority Accounting that affect the Council.

3. ACCOUNTING POLICIES

- 3.1 The existing Accounting Policies have been updated for the 2022/23 Statement of Accounts. However, at the time of writing, the 2022/23 Code of Practice Guidance notes have yet to be published showing the required changes in Accounting Policies for 2022/23. The updated policies are attached at **Appendix A**. Members are asked to consider the accounting policies as outlined to provide the basis for the preparation of the 2022/23 Accounts. These will be prepared by Cumberland

Council on behalf of Carlisle City Council and will be signed off by Cumberland's S151 Officer. If there are any subsequent significant changes to the policies following publication of the Guidance Notes, these will be reported to the Committee at the next available meeting.

- 3.2 To facilitate Members understanding of the accounts, the accounting policies and the main changes required as a result of the 2022 Code of Practice, a training session will be proposed for Members in June/July.

4. RECOMMENDATIONS

Members are asked to note the update on the 2022/23 accounts and to consider the draft accounting policies to be used in the preparation of the 2022/23 accounts.

Contact details:

Contact Officer: Steven Tickner

Ext: 7280

Appendices attached to report:

- **Appendix A – Draft Accounting Policies 2022/23**

Note: in compliance with section 100d of the Local Government Act 1972 the report has been prepared in part from the following papers:

- None

Corporate Implications:

LEGAL - The Audit Committee's terms of reference require it to consider the Council's compliance with its own and other published standards and controls and to consider whether appropriate accounting policies have been followed.

PROPERTY SERVICES - The statement of accounts include the valuations of the Council's assets. The Valuation process to provide the value of the assets is carried out by property services in conjunction with external expert valuers.

FINANCE – contained within body of the report

EQUALITY – none

INFORMATION GOVERNANCE – none

4.0 Accounting Policies

4.0.1 General Principles

The Statement of Accounts summarises the Council's transactions for the 2022/23 financial year and its position at the year-end of 31 March 2023. The Council is required to prepare an annual Statement of Accounts by the Accounts and Audit Regulations 2015 and the Accounts by the Accounts and Audit (amended) Regulations 2021, which require the accounts to be prepared in accordance with proper accounting practices. These practices primarily comprise the Code of Practice on Local Authority Accounting in the United Kingdom 2022/23, supported by International Financial Reporting Standards (IFRS).

The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

4.0.2 Accruals of Income and Expenditure

Activity is accounted for in the year that it takes place, not simply when cash payments are made or received. In particular:

- Revenue from contracts with service recipients, whether for services or the provision of goods, is recognised when (or as) the goods or services are transferred to the service recipient in accordance with the performance obligations in the contract.
- Supplies are recorded as expenditure when they are consumed – where there is a gap between the date supplies are received and their consumption, they are carried as inventories on the Balance Sheet.
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made.
- Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure based on the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract.
- Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where debts may not be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected.

4.0.3 Cash and Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that mature in three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and form an integral part of the Council's cash management.

4.0.4 Exceptional Items

When items of income and expense are material and out of the ordinary, their nature and amount is disclosed separately, either on the face of the Comprehensive Income and Expenditure Statement or in the notes to the accounts, depending on how significant the items are to an understanding of the Council's financial performance.

4.0.5 Prior Period Adjustments, Changes in Accounting Policies and Estimates and Errors

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e. in the current and future years affected by the change and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the Council's financial position or financial performance.

Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period.

4.0.6 Charges to Revenue for Non-Current Assets

Services, support services and trading accounts are debited with the following amounts to record the cost of holding fixed assets during the year:

- depreciation attributable to the assets used by the relevant service
- revaluation and impairment losses on assets used by the service where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off
- amortisation of intangible fixed assets attributable to the service.

The Council is not required to raise council tax to cover these costs but is required to make an annual contribution to reduce its overall borrowing requirement. This is known as the Minimum Revenue Provision and is calculated as 3% of the Council's Capital Financing Requirement at the start of the financial year on a straight-line basis. Depreciation, impairment losses, revaluation losses and amortisations are therefore replaced by a revenue provision in the Movement in Reserves Statement by way of an adjusting transaction with the Capital Adjustment Account for the difference between the two.

4.0.7 Employee Benefits

Benefits Payable During Employment

Short-term employee benefits are those due to be settled within 12 months of the year-end. They include such benefits as wages and salaries, paid annual leave and paid sick leave, bonuses and non-monetary benefits (e.g. cars) for current employees and are recognised as an expense for services in the year in which employees render service to the Council. An accrual is made for the cost of holiday entitlements (or any form of leave, e.g. time off in lieu) earned by employees but not taken before the year-end which employees can carry forward into the next financial year. The accrual is made at the wage and salary rates applicable in the following accounting year, being the period in which the employee takes the benefit. The accrual is charged to Surplus or Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that holiday benefits are charged to revenue in the financial year in which the holiday absence occurs.

Termination Benefits

Termination benefits are amounts payable as a result of a decision by the Council to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy and are charged on an accruals basis to the appropriate service line in the Comprehensive Income and Expenditure Statement on the earlier of when the Council can no longer withdraw the offer of those benefits or when the authority recognises costs for a restructuring that is within the scope of section 8.2 of the Code and IAS37 and involves the payment of termination benefits.

Where termination benefits involve the enhancement of pensions, statutory provisions require the General Fund balance to be charged with the amount payable by the Council to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards.

In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end.

Post-Employment Benefits

Employees of the Council are members of the Local Government Pension Scheme (LGPS) administered by Cumbria County Council.

The scheme is a funded defined benefit scheme meaning that the scheme provides retirement lump sums and pensions, earned as employees work for the Council. As a defined benefit scheme, it is shown within the Council's accounts using the following principles:

- The liabilities of the Cumbria Local Government Pension Scheme attributable to the Council are included in the balance sheet on an actuarial basis using the projected unit method. This basis uses an assessment of the future payments that will be made in relation to the retirement benefits earned to date by employees, after considering assumptions about mortality rates, employee turnover and earnings projections for employees.
- Liabilities are discounted to their value at current prices using a real discount rate of 2.8%.
- The assets of the LGPS attributable to the Council are included in the Balance Sheet at their fair value.
 - quoted securities – current bid price
 - unquoted securities – professional estimate
 - unitised securities – current bid price
 - property – market value

Around 52% of LGPS assets are held in equity investments and bond issues with the remainder held in property and other assets.

- The change in the net pension liability is analysed into six components and recognised in the Statements as follows:

Service Cost comprising:

- **Current service cost** – the increase in liabilities as a result of years of service earned this year is charged to service revenue accounts, based on where employees worked, within the Net Cost of Services section of the Comprehensive Income and Expenditure Statement.
- **Past service cost** – the increase in liabilities arising from current year decisions whose effect relates to years of service earned in earlier years is charged to Non-Distributed Costs within Net Cost of Services in the Comprehensive Income and Expenditure Statement.
- **Net Interest on the defined pension liability (asset)** – i.e. net interest expense for the authority – the change during the period in the net defined benefit liability (asset) that arises from the passage of time charged to the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement – this is calculated by applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the net defined benefit liability (asset) at the beginning of the period – taking into account

any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payments.

Re-measurements comprising:

- **The return on plan assets** – excluding amounts included in net interest on the net defined benefit liability (asset) – charged to the Pensions Reserve as Other Comprehensive Income and Expenditure
- **Actuarial gains and losses** – changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuaries have updated their assumptions – charged to the Pensions Reserve as Other Comprehensive Income and Expenditure
- **Contributions paid to the Cumbria Local Government Pension Fund** – cash paid as employers' contributions to the pension fund. This is not accounted for as an expense.

Measurement bases applied in respect of the LGPS assets and liabilities are set out in note 4.42 to the Accounts.

Statutory provisions require the General Fund balance to be charged with the amount payable by the Authority to the pension fund or directly to pensioners in the year, not the amount calculated according to the relevant accounting standards. This therefore means that within the Movement in Reserves Statement, there are appropriations to and from the Pensions Reserve to remove the notional transactions for retirement benefits and replace them with debits for the amounts paid to the pension fund in the year and any such amounts payable but unpaid at the year-end.

The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

Discretionary Benefits

The Council also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff are accrued in the year of decision and accounted for using the same policies as are applied to the LGPS.

4.0.8 Events after the Balance Sheet Date

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the end of the reporting period – the Statement of Accounts is adjusted to reflect such events;
- those that are indicative of conditions that arose after the reporting period – the Statement of Accounts is not adjusted to reflect such events, but where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

4.0.9 Financial Instruments

Financial Liabilities

Financial Liabilities are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value and are

carried at their amortised cost. Annual charges to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments over the life of the instrument to the amount at which it was originally recognised.

(i) **Borrowing**

Borrowing is classed as either a long-term liability, repayable after 12 months or longer, or a current liability if it is repayable within a 12-month period. Borrowing is shown in the Balance Sheet at amortised cost using the effective interest rate that applies to the individual loans comprising the total borrowing held by the Council. For borrowing held by the Council, this means that the amount shown in the balance sheet represents the outstanding principal payable to the lender and the interest on the borrowing that is charged to the Comprehensive Income and Expenditure Statement is the amount payable in the year under the loan agreement.

(ii) **Creditors**

Creditors are recognised when a contractual arrangement is entered into between the Council and a supplier to provide goods and services for an agreed price. The value of the creditors recognised in the balance sheet represents the current value of the outstanding liabilities of the Council at 31 March as a proxy for amortised cost.

Financial Assets Measured at Amortised Cost

Financial assets measured at amortised cost are recognised on the Balance Sheet when the authority becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost. Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement (CIES) for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the financial assets held by the authority, this means that the amount presented in the Balance Sheet is the outstanding principal receivable (plus accrued interest) and interest credited to the CIES is the amount receivable for the year in the loan agreement.

Any gains and losses that arise on the derecognition of an asset are credited or debited to the Financing and Investment Income and Expenditure line in the CIES.

Expected Credit Loss Model

The authority recognises expected credit losses on all of its financial assets held at amortised cost or either on a 12-month or lifetime basis. The expected credit loss model also applies to lease receivables and contract assets. Only lifetime losses are recognised for trade receivables (debtors) held by the authority.

Impairment losses are calculated to reflect the expectation that the future cash flows might not take place because the borrower could default on their obligations. Credit risk plays a crucial part in assessing losses. Where risk has increased significantly since an instrument was initially recognised, losses are assessed on a lifetime basis. Where risk has not increased significantly or remains low, losses are assessed on the basis of 12-month expected losses.

Financial Assets Measured at Fair Value through Profit and Loss

Financial assets that are measured at Fair Value through Profit and Loss are recognised on the Balance Sheet when the authority becomes a party to the contractual provisions of a financial instrument and are initially measured and carried at fair value. Fair value gains and losses are recognised as they arrive in the Surplus or Deficit on the Provision of Services.

The fair value measurements of the financial assets are based on the following techniques:

- instruments with quoted market prices – the market price

- other instruments with fixed and determinable payments – discounted cash flow analysis.

The inputs to the measurement techniques are categorised in accordance with the following three levels:

- Level 1 inputs – quoted prices (unadjusted) in active markets for identical assets that the authority can access at the measurement date.
- Level 2 inputs – inputs other than quoted prices included within Level 1 that are observable for the asset, either directly or indirectly.
- Level 3 inputs – unobservable inputs for the asset.

Any gains and losses that arise on the derecognition of the asset are credited or debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

4.0.10 Government Grants and Contributions

Whether paid on account, by instalments or in arrears, government grants and third-party contributions and donations are recognised as due to the Council when there is reasonable assurance that:

- the Council will comply with the conditions attached to the payments, and
- the grants or contributions will be received.

Amounts recognised as due to the Council are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contribution have been satisfied. Conditions are stipulations that specify that the future economic benefits or service potential embodied in the asset acquired using the grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor.

Monies advanced as grants and contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors. When conditions are satisfied, the grant or contribution is credited to the relevant service line (attributable revenue grants and contributions) or Taxation and Non-Specific Grant Income (non-ringfenced revenue grants and all capital grants) in the Comprehensive Income and Expenditure Statement.

Where capital grants are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied reserve. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

4.0.11 Heritage Assets

Tangible and Intangible Heritage Assets (described in this summary of significant accounting policies as heritage assets)

The majority of the Council's Heritage Assets are held in the Council's Museum. The Museum has four collections of heritage assets, Archaeology, Social History, Natural History and Fine and Decorative Arts, which are held in support of the primary objective of the Council's Museum, i.e. increasing the knowledge, understanding and appreciation of the Council's history and local area. Heritage Assets are recognised and measured (including the treatment of revaluation gains and losses) in accordance with the Council's accounting policies on property, plant, and equipment. However, some of the measurement rules are relaxed in relation to heritage assets as described below. The accounting policies in relation to heritage assets that are deemed to include elements of intangible heritage assets are also presented below. The Council's primary collections of heritage assets are accounted for as follows.

Museum Collection

The Council's museum collection consists of a significant number of artefacts including pictures, prints, sculptures, china, glass, porcelain, coins, medals archaeological items, as well as significant numbers of social and natural history items, costumes, and firearms. Museum collections are reported in the Council's balance sheet at insurance valuation which take into account current market values. These insurance valuations are reviewed on an annual basis as part of the overall insurance premium renewal process.

Acquisitions are made by purchase or donation. Acquisitions are initially recognised at cost and donations are recognised at valuation with valuations being based on appropriate insurance values. The Museum has a defined acquisitions and disposals policy for the period 2018 - 2021 that sets out the policy for the development of collections at the museum.

Heritage assets will not be subject to depreciation as it is not deemed appropriate to estimate a useful life for the assets held.

Statues, Monuments, and other historical buildings

The Council has a number of statues and monuments and other historical buildings that it does not consider that reliable cost or valuation information can be obtained. This is due to the historical significance of such items. However, in some cases, historical cost information is recorded, particularly those that were previously classified as Community assets. Therefore, those items that were previously categorised as Community Assets will be recognised at their historic cost. This will be re-evaluated so that the most appropriate valuation basis is used, and those previously not recognised (primarily statues and monuments) will not be recognised on the balance sheet although appropriate disclosures made.

Heritage Assets – General

The carrying amounts of heritage assets are reviewed where there is evidence of impairment for heritage assets, e.g. where an item has suffered physical deterioration or breakage or where doubts arise as to its authenticity. Any impairment is recognised and measured in accordance with the Council's general policies on impairment – see note 4.0.16 in this summary of significant accounting policies. The trustees of the Council's Museum will occasionally dispose of heritage assets which have a doubtful provenance or are unsuitable for public display. The proceeds of such items are accounted for in accordance with the Council's general provisions relating to the disposal of property, plant, and equipment.

Disposal proceeds are disclosed separately in the notes to the financial statements and are accounted for in accordance with statutory accounting requirements relating to capital expenditure and capital receipts.

4.0.12 Inventories and Long-Term Contracts

Stocks are reflected in the balance sheet at current prices. This is a departure from the requirements of the Code and IAS 2 Inventories, which requires stocks to be shown at the lower of cost or net realisable value where they are acquired through an exchange transaction.

4.0.13 Investment Property

Investment properties are those that are used solely to earn rentals and for capital appreciation or both. The definition is not met if the property is used in the production or supply of goods or services or for administrative purposes or is held for sale.

Investment properties are measured initially at cost and subsequently at fair value, based on the amount at which the asset could be exchanged between knowledgeable parties at arm's-length. As a non-financial asset, investment properties are measured at highest and best use. Properties are not depreciated but are revalued annually according to market conditions at the year-end. Gains and losses on revaluation are posted to the Financing and Investment Income and Expenditure line

in the Comprehensive Income and Expenditure Statement. The same treatment is applied to gains and losses on disposal.

Rentals received in relation to investment properties are credited to the Financing and Investment Income line and result in a gain for the General Fund Balance. However, revaluation and disposal gains and losses are not permitted by statutory arrangements to have an impact on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and (for any sale proceeds greater than £10,000) the Capital Receipts Reserve.

4.0.14 Leases

Leases are classified as finance leases where the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the property, plant, or equipment from the lessor to the lessee. All other leases are classified as operating leases.

Where a lease covers both land and buildings, the land and buildings elements are considered separately for classification.

Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets.

The Council as Lessee

Operating Leases

Rentals paid under operating leases are charged to the Comprehensive Income and Expenditure Statement as an expense of the services benefitting from use of the leased property, plant, or equipment. Charges are made on a straight-line basis over the life of the lease, even if this does not match the pattern of payments (e.g. there is a rent-free period at the commencement of the lease).

The Council as Lessor

Operating Leases

Where the Council grants an operating lease over a property or an item of plant or equipment, the asset is retained in the Balance Sheet. Rental income is credited to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Credits are made on a straight-line basis over the life of the lease, even if this does not match the pattern of payments (e.g. there is a premium paid at the commencement of the lease). Initial direct costs incurred in negotiating and arranging the lease are added to the carrying amount of the relevant asset and charged as an expense over the lease term on the same basis as rental income.

4.0.15 Overheads and Support Services

The costs of overheads and support services are charged to those that benefit from the supply or service. The total absorption costing principle is used – the full cost of overheads and support services are shared between users in proportion to the benefits received, with the exception of:

- Corporate and Democratic Core – costs relating to the Council's status as a multifunctional, democratic organisation.
- Non- Distributed Costs – the cost of discretionary benefits awarded to employees retiring early and impairment losses chargeable on Assets Held for Sale.

4.0.16 Property, Plant and Equipment

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment.

Recognition

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment is capitalised on an accruals basis, provided that it is probable that the future economic benefits or service potential associated with the item will flow to the Council and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (i.e. repairs and maintenance) is charged as an expense when it is incurred.

De-minimis levels have been set at:

- £5,000 for expenditure on individual items of vehicles, plant, and equipment.
- £20,000 for expenditure on land, buildings, and other structures.

Measurement

Assets are initially measured at cost, comprising:

- the purchase prices.
- any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management

The Council does not capitalise borrowing costs incurred whilst assets are under construction.

The cost of assets acquired other than by purchase is deemed to be its fair value unless the acquisition does not have commercial substance (i.e. it will not lead to a variation in the cash flows of the Council). In the latter case, where an asset is acquired via an exchange, the cost of the acquisition is the carrying amount of the asset given up by the Council.

Donated assets are measured initially at current value. The difference between fair value and any consideration paid is credited to the Taxation and Non-specific Grant Income line of the Comprehensive Income and Expenditure Statement unless the donation has been made conditionally. Until conditions are satisfied, the gain is held in the Donated Assets Account. Where gains are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance to the Capital Adjustment Account in the Movement in Reserves Statement.

Assets are then carried in the Balance Sheet using the following measurement bases:

- infrastructure, community assets – depreciated historical cost
- assets under construction – historic cost
- dwellings – current value, determined using the basis of existing use value for social housing (EUV-SH)
- council offices – current value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV), except for a few offices that are situated close to the council's housing properties, where there is no market for office accommodation, and that are measured at depreciated replacement cost (instant build) as an estimate of current value
- surplus assets – the current value measurement base is fair value, estimated at highest and best use from a market participant's perspective
- all other assets – current value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV).

Where there is no market-based evidence of current value because of the specialist nature of an asset, depreciated replacement cost (DRC) is used as an estimate of current value. This includes assets such as Cemeteries and Crematoria, Leisure Centres, Museums, Community Centres, Hostels and Public Conveniences.

Where non-property assets that have short useful lives or low values (or both), depreciated historical cost basis is used as a proxy for current value.

Assets included in the Balance Sheet at current value are revalued sufficiently regularly to ensure that their carrying amount is not materially different from their current value at the year-end. Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains.

Exceptionally, gains might be credited to the Surplus or Deficit on the Provision of Services where they arise from the reversal of a loss previously charged to a service.

Where decreases in value are identified, they are accounted for by:

- where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains)
- where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

Impairment

Assets are assessed at each year-end as to whether there is any indication that an asset may be impaired. Where indications exist and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall.

Where impairment losses are identified, they are accounted for by:

- where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains)
- where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant service line(s) in the Comprehensive Income and Expenditure Statement, up to the amount of the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

Depreciation

Depreciation is provided for on all Property, Plant and Equipment assets by the systematic allocation of their depreciable amounts over their useful lives. An exception is made for assets without a determinable finite useful life (i.e. freehold land and certain Community Assets) and assets that are not yet available for use (i.e. assets under construction).

Depreciation is calculated on the following bases:

Asset Category	Rate	Basis
Dwellings & Other Buildings	Useful Life	Straight Line
Infrastructure Assets	Useful Life	Straight Line
Vehicles, Plant, furniture & Equipment	Useful Life	Straight Line
Intangible Assets	Useful Life	Straight Line

Where an item of Property, Plant and Equipment asset has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

Componentisation

The Council has a policy on componentisation where any asset with a Gross Book Value of more than £1million and is subject to depreciation will be considered for componentisation where a component is deemed to be more than 5% of the assets value. This will primarily apply to buildings and the major components to be considered will be:

Component
Heating and Ventilation System
Windows
Electrical
Roofing
Cremator

Disposals and Non-current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and current value less costs to sell. Where there is a subsequent decrease to current value less costs to sell, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in current value are recognised only up to the amount of any previous losses recognised in the Surplus or Deficit on Provision of Services. Depreciation is not charged on Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to non-current assets and valued at the lower of their carrying amount before they were classified as held for sale; adjusted for depreciation, amortisation or revaluations that would have been recognised had they not been classified as Held for Sale, and their recoverable amount at the date of the decision not to sell.

Assets that are to be abandoned or scrapped are not reclassified as Assets Held for Sale. When an asset is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal). Any revaluation gains accumulated for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Amounts received for a disposal in excess of £10,000 are categorised as capital receipts and are required to be credited to the Capital Receipts Reserve and can then only be used for new capital investment or set aside to reduce the Council's underlying need to borrow (the capital financing requirement). Receipts are appropriated to the Reserve from the General Fund Balance in the Movement in Reserves Statement.

The written-off value of disposals is not a charge against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

4.0.17 Current and Fair Value Measurement

The Council measures some of its non-financial assets such as surplus assets and investment properties and some of its financial instruments such as equity shareholdings at current or fair value at each reporting date. Current or fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- a) in the principal market for the asset or liability, or
- b) in the absence of a principal market, in the most advantageous market for the asset or liability.

The Council measures the current or fair value of an asset or liability using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

When measuring the current or fair value of a non-financial asset, the council takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The council uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Inputs to the valuation techniques in respect of assets and liabilities for which current or fair value is measured or disclosed in the council's financial statements are categorised within the current or fair value hierarchy, as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities that the authority can access at the measurement date

Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3 – unobservable inputs for the asset or liability.

4.018 Infrastructure Assets

Highways Network Infrastructure Assets

Highways network infrastructure assets include carriageways, footways and cycle tracks, structures (e.g. bridges), street lighting, street furniture (e.g. illuminated traffic signals, bollards), traffic management systems and land which together form a single integrated network.

Recognition

Expenditure on the acquisition or replacement of components of the network is capitalised on an accrual basis, provided that it is probable that the future economic benefits associated with the item will flow to the Authority and the cost of the item can be measured reliably.

Measurement

Highways network infrastructure assets are generally measured at depreciated historical cost. However, this is a modified form of historical cost - opening balances for highways infrastructure assets were originally recorded in balance sheets at amounts of capital undischarged for sums

borrowed as at 1 April [1994 England and Scotland], [1996 Wales] which was deemed at that time to be historical cost.

Where impairment losses are identified, they are accounted for by the carrying amount of the asset being written down to the recoverable amount.

Depreciation

Depreciation is provided on the parts of the highways network infrastructure assets that are subject to deterioration or depletion and by the systematic allocation of their depreciable amounts over their useful lives.

Annual depreciation is the depreciation amount allocated each year.

Useful lives of the various parts of the highways network are assessed by the valuer using industry standards where applicable

Disposals and derecognition

When a component of the Network is disposed of or decommissioned, the carrying amount of the component in the Balance Sheet is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the same line in the Comprehensive Income and Expenditure Statement, also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal).

The written-off amounts of disposals is not a charge against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are transferred to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

Where a part of the network is replaced, an adaptation provided in a separate update to the Code assumes that from the introduction of the IFRS based Code when parts of an asset are replaced or restored the carrying amount of the derecognised part will be zero because parts of infrastructure assets are rarely replaced before the part has been fully consumed.

4.0.19 Provisions, Contingent Liabilities and Contingent Assets

Provisions

Provisions are made where an event has taken place that gives the Council a legal or constructive obligation that probably requires settlement by a transfer of economic benefits or service potential, and a reliable estimate can be made of the amount of the obligation. For instance, the Council may be involved in a court case that could eventually result in the making of a settlement or the payment of compensation.

Provisions are charged as an expense to the appropriate service line in the Comprehensive Income and Expenditure Statement in the year that the Council becomes aware of the obligation, and are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties.

When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year – where it becomes less than probable that a transfer of economic benefits will now be required (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant service.

Where some or all of the payment required to settle a provision is expected to be recovered from another party (e.g. from an insurance claim), this is only recognised as income for the relevant service if it is virtually certain that reimbursement will be received if the Council settles the obligation.

Contingent Liabilities

A contingent liability arises where an event has taken place that gives the Council a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required, or the amount of the obligation cannot be measured reliably.

Contingent liabilities are not recognised in the Balance Sheet but disclosed in a note to the accounts.

Contingent Assets

A contingent asset arises where an event has taken place that gives the Council a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

4.0.20 Reserves

The Council sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by appropriating amounts out of the General Fund Balance in the Movement in Reserves Statement. When expenditure to be financed from a reserve is incurred, it is charged to the appropriate service in that year to score against the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement. The reserve is then appropriated back into the General Fund Balance in the Movement in Reserves Statement so that there is no net charge against council tax for the expenditure.

Certain reserves are kept managing the accounting processes for non-current assets, financial instruments, retirement, and employee benefits and do not represent usable resources for the Council – these reserves are explained in the relevant policies.

4.0.21 Revenue Expenditure Funded from Capital under Statute

Expenditure incurred during the year that may be capitalised under statutory provisions but that does not result in the creation of a non-current asset has been charged as expenditure to the relevant service in the Comprehensive Income and Expenditure Statement in the year. Where the Council has determined to meet the cost of this expenditure from existing capital resources or by borrowing, a transfer in the Movement in Reserves Statement from the General Fund Balance to the Capital Adjustment Account then reverses out the amounts charged so that there is no impact on the level of council tax.

4.0.22 VAT

VAT payable is included as an expense only to the extent that it is not recoverable from Her Majesty's Revenue and Customs. VAT receivable is excluded from income.

4.0.23 Council Tax / Non-Domestic Rates (NDR) Income

The Council is required by statute to maintain a separate fund for the collection and distribution of amounts due in respect of Council Tax and Non-Domestic Rates (NDR). The Statutory Collection Fund (England) Statement is included as a supplementary statement in the accounts. In its capacity as billing authority the Council acts as an agent. During 2022/23 the Council collected and distributed NDR on behalf of itself, the Government and Cumbria County Council. Council Tax was collected and distributed on behalf of the City Council, the County Council, the Police and Crime Commissioner for Cumbria and local town and parish councils.

Council Tax accrued income for the year and Council Taxpayers debtors, creditors, and provision for bad debts at the 31 March are shared between the major preceptors and the Council based on their percentage share of the total demands/precepts for the year. Business rates accrued income

for the year as well as business ratepayers, debtors, creditors and provisions for bad debts and appeals are shared between the Council (40%), Government (50%) and Cumbria County Council (10%).

Collection Fund Debtors are reviewed collectively at the balance sheet date by debt type and provision is made for impairment based on the historical evidence of default in each category. The Council's share of the Collection Fund Debtors shown in the balance sheet is net of this bad debt provision.

In accordance with the current accounting code of practice the Council's Comprehensive Income and Expenditure Statement includes its share of accrued council tax and business rates income. Where this amount is more or less than the amount to be credited to the General Fund under statute, there is an adjusting transfer in the Movement in Reserves Statement, between the General Fund Balance and the Collection Fund Adjustment Account. This account holds the Council's share of the Collection Fund Surplus or Deficit at the 31 March. The Council's Balance Sheet includes the net creditor/debtor position with the Government and major preceptors for taxes collected on their behalf and not yet paid to them or taxes paid to them but not yet collected from taxpayers.
